Skills

- **Programming Languages** : Javascript, Java
- **Libraries and Frameworks** : React.js, Node.js, Redux Toolkit, Express.js, TailwindCSS, AntD
- **Tools** : MySQL, MongoDB, Git, GitHub, Postman

Projects

IMDB-clone

<https://ashit-negi.github.io/imdb-clone/>

- Designed a movie listing web app that allows users to browse movies and manage a watchlist.
- Utilized React and Vite to create a smooth user experience for adding/removing movies and filtering by genre.
- Implemented a responsive and clean user interface using TailwindCSS.

Photo-App

<https://ashit-negi.github.io/photos-apps/>

- A custom photography portfolio app to showcase high-quality images.
- Built with React for smooth performance and seamless navigation.
- Provides a clean and modern UI for an immersive browsing experience.

Achievements

- Fast & lightweight with optimized performance using React and Vite
- Smooth user experience with a clean and responsive UI
- Custom features: Watchlist with genre filtering (IMDb Clone) and high-quality image showcase (Photo App)
- Mobile-friendly design for seamless use on all devices
- Engaging and interactive layout to enhance user experience
