## SUMMARY

---

Entry-level Full Stack Developer with hands-on experience in building, deploying, and maintaining MERN stack web applications. Proficient in JavaScript, React.js, Node.js, Express.js, and MongoDB. Experienced in RESTful API development, JWT-based authentication and authorization, Stripe payment gateway integration, and responsive web design. Actively seeking a Junior Full Stack Developer or Web Developer role.

## SKILLS

---

**Programming Languages:** JavaScript

**Frontend Technologies:** HTML5, CSS3, React.js, Redux, Tailwind CSS, Vite, Responsive Web Design

**Backend Technologies:** Node.js, Express.js

**Databases:** MongoDB, MySQL

**APIs & Security:** RESTful API Development, JWT Authentication, Role-Based Authorization

**Tools & Platforms:** Git, GitHub, Postman, Visual Studio Code

**Payments:** Stripe Payment Gateway Integration

## PROJECTS

---

### Food Delivery Web Application

- Engineered a full-stack food delivery application using React.js, Node.js, Express.js, and MongoDB
- Enforced JWT-based authentication and role-based authorization for users and restaurant owners
- Designed restaurant-wise food listings, cart functionality, and complete order lifecycle workflows
- Integrated Stripe payment gateway to process secure online card transactions
- Developed scalable RESTful APIs following MVC architecture and industry best practices

Link: <https://food-del-seven-topaz.vercel.app/>

### BookMyShow App

- Built a movie booking platform featuring real-time seat selection functionality
- Orchestrated end-to-end ticket booking workflows including online payment processing
- Developed backend RESTful APIs for booking management and transaction handling

Link: <https://bookmyshow-clone-c4rs.onrender.com>

### IMDB

- Created a movie listing application by consuming third-party APIs
- Implemented real-time search functionality and user watchlist features
- Designed a responsive and user-friendly interface to enhance user experience
